COOK UP CG MEAL 3DWORLD N.259

My passion is everything is exist in the CG world and spends all of my time in this field Reading Magazine, work with many different software and plugins which can help me progress more and more. The idea started when I see some tasty pictures on the internet The Royal Dish is a personal project and I decided to do different work in CG filed.

SPORT CAR ADVERTISEMENT 3DWORLD N.266

The inspiration for this work came to me when I saw various photos of moving sports cars on the internet. All the cars were accompanied by motion blur which is a beautiful effect that simulates moving volumes, and I was very fascinated.

AUTUMNAL ARCHVIZ SCENE 3DWORLD N.269

The idea for this project started when I was going to start the Forest Pack plugin training package and get ready to explain the workshops, I was going to explain in this training package. So, for the project I needed to simulate a space inside the forest with lots of plants and leaves so that I could take advantage of the power and features of this plugin.

FOUNTAIN WITH PHOENIX 3DWORLD N.270

One of the most beautiful elements that can give freshness to the garden or yard is the fountain The fountain is known as a decorative element in architecture, in which water is thrown upwards with specific and relatively high pressure from specific pipes and then flows back into a basin located below this element. The combination of stone and water give this element a unique beauty.

CG MEAL 3D ART DESIGN ANNUAL 2021

My passion is everything is exist in the CG world
and spends all of my time in this field Reading
Magazine, work with many different software
and plugins which can help me progress more and
more. The idea started when I see some tasty pictures
on the internet The Royal Dish is a personal project
and I decided to do different work in CG filed.

STYLISH SCANDINAVIAN ROOM 3DWORLD N.273

I have always been very interested in Scandinavian style
because this style creates a very relaxing atmosphere
due to the use of a lot of natural ambient light and sunshine
That's why I decided to paint a small apartment that
includes a bedroom and a dining room. Before we start
we should always consider what we want to do, given
that this space is supposed to show the Scandinavian style
so I need to get a lot of ambient light.

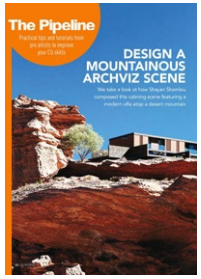

BEAUTIFUL MODERN VILLA 3DWORLD N.275

The subject of this article is about Visualizing a modern villa
located in Australia. The architect of this project has designed
this villa in such a way that we have a green area in front of
the villa with a parking entrance. This villa is surrounded by 2
neighboring villas and is surrounded by a swimming pool
with a fountain and also a relatively small green space behind the villa

MOUNTAINOUS ARCHVIZ 3DWORLD N.281

The article we are going to talk about today is about building
an architectural simulation scene this time with a different atmosphere
located in the desert. Rocky red mountains are the best idea to build
and simulate an external architectural scene
Modern and minimal villa that is covered with black stone, white cement and wood
The way to reach this villa is through the mountains and roads, which you can easily
reach with a safari car, which may not be noticed by many people in the scene
but you have to put it on the scene to be able to tell a true story
